PROSPECTUS OF THE "NATIONAL MON-UMENT," A weekly journal to be published in Washington. under the sanction of the Washington National

Monument Society.

JAMES C. PICKETT, EDITOR AND PUBLISHER.

The Monument is intended to be a literary, agricultural, and miscellaneous paper. It will contain selections of the literature of the day—the best that can be found in American and English publications interesting scientific articles, embracing mechanics; foreign and domestic news; a synopsis of the proceedings of Congress, and every thing that such a journal might be expected to contain, with the exception of party politics, which will be at all times most rigorously excluded.

The Monument will be published for the express and the sole purpose of aiding in the erection of the noble column now rising on the banks of the Potomae, in honor of the Father of his Country, and which every one who renerates the name of Washingron would rejoice to see completed. After deducting out of the subscription the expenses of the journal proposed to be published, the remaining funds will be faithfully applied, and without reserve, to the purpose indicated. The aid, therefore, of all who are willing to contribute to so patriotic an object, and one so entirely national, is earnestly requested. By subscribing to the Monument, a valuable journal at a low price may be obtained, while it will be doing something, at the same time, towards completing that majestic menorial of the Nation's gratitude.

The Board of Managers recommend Mr. Pickett, former-yFourth Auditor of the Treasury and Charge d'Affairs to Peru, who proposes to edit and publish the Monument journal, as one well qualified to perform the duties of editor, and to conduct the paper faithfully, and satisfactorily to the subscribers. They assure their fellow-citizens that this enterprise is not a speculation got up for individual emolument. Mr. Pickett will make the experiment with his own means and at his own risk; if successful, he will receive nothing more, and he asks nothing more.

Austin's Magic Freezer,
Through in six minutes. For the preparation of
Ice Creams, Water Ices, &c.—Patented Sep-

Ice Creams, Water Ices, &c.—Patented September 19, 1848.

THE distinguising merits of this Apparatus are—

1st. The astonishing rapidity of the process, surpassing belief—hence the name.

2d. The Cream during the progress of freezing becomes charged with atmospheric air, by which it nearly doubles in bulk, and obtains that peculiar smoothness, lightness, and delicacy of flavor, for which the Ice Cream of our best Confectioners is so highly prized.

3d. It does not require a tenth part of the labor that the common Freezer does.

4th. It does its work better, producing a better article, in every respect, than by any other mode.

5th. There is a considerable saving in ice, as the tub needs no replenishing during the operation.

The annexed testimonial from the Proprietor of the Eutaw House will put to rest all doubt.

"Having witnessed the process of freezing Ice Cream having been frozen in the incredible short time of six minutes, I cheerfully recommend it to the public."

H. F. JACKSON,

Eutaw House, Baltimore, May 16, 1848.

"This is to certify, that during the coverage of 1848. I

Cheerfully recommend it to the public."

H. F. JACKSON,

Eutaw House, Baltimore, May 15, 1848.

"This is to certify, that during the summer of 1848, 1 used one of Austin's Patent I.e. Cream Freesers of the largest size, (10 gallons,) making from 10 to 50 gallons per day during the season; and so far as regards expedition and power, I consider it decidedly the best freezer now in use, as I have had with it no difficulty in making ten gallons of superior quality Ice Cream from five of plain Cream, in thirty minutes from the time I commenced working it.

Newark Academy.

Rewark Academy.

By a late re-organization of this department of Delaware College, the Board of Trustees have taken measures to place it upon a new and improved foundation, and to endow it with advantages possessed by few similar institutions in the country. The Academy, heretafore inerged in the College, and of course subjected to all this evils which have been found to attend the smalgamation of the two departments in the same building, and under the same government, now enjoys the privilege of a separate establishment, without lesing those which result from its relation to the College ptoper.

A large and elegant editice, with all the necessary fixtures of a complete boarding establishment, has been erected and furnished, in which the students of the Academy board, under the immediate charge of the Principal and his Assistants; and all its exercises are conducted on a system of its own, uninterrupted by the interests or operations of the other department. The furniture of the study comes and dormitories has been chosen with peculiar reference to comfurt and convenience for study; and no expense has been spared in providing the apparatus necessary to render the means of instruction complete; giving to Newark Academy ficilities for private study and comfortable accommodation of students, fully equal to thoke afforded by many of our colleges.

From its intimate relation to the College, students of the Academy unjoy many advantages not generally obtained at institutions of this kind. Those who wish to pursue some particular branch which falls more properly within the College course, may be admitted to recite in any of the College classes. Students also of proper age and discretion, by recommendation of the Principal, and permission of the Faculty, may enjoy fix use of the College as can be profitably enjoyed by academical students.

The charge for Boarding, Washing, Fuel, Light, &c., with tuition in the English, Latin, and Greek, is sevently dollars for the Summer Session, and seventy-five for the Winter Session

Rev. MATTHEW MEIGS, A. M.,
President of Delaware College.

Wilmington Boarding School For Boys - This institution is situated in one of the healthtest parts of the city of Winnington, entirely beyond the settled portions of the town. The uniform healthfulness of the location may be inferred from the fact that, since the establishment of the School, about twenty sight years, very faw cases of iserious indisposition have occurred among the pupils, and not a studie death either here, or from diseases contracted while here.

The course of instruction includes, besides the ordinary English branches. Natural Philosophy, Chemistry, Physiology, History, Rhetoric, the various branches of Mathematics, and the Latin, Greek, and Franch Jasquinger. Particular attention is paid to the higher Mathematics and their application to Mechanics and Engineering; the latter and Surveying are taught practically by field operations, with the use of appropriate instruments. Loctures on Natural Philosophy and Chemistry, in, which all the important principles are illustrated by experiments, are regularly delivered before the students.

"As the object is to make the instruction as thorough and practical as possible, no expense has been spared in providing suitable apparatus. It is believed that, in this respect, the Institution will compare favorably with any similar one in the country. A carefully selected library, of more than one thousand volumes, containing works on the various branches of literature and Science, fairnishes ample reading matter; while a Laboratory, fully supplied with apparatus and tests, contains all that is necessary for practical instruction in Chemical Manipulation.

The school year commenced on the third Second-day (Monday) of the Ninth month, (September,) and is divided into four quarters of sleven weeks each, leaving a vacation of two months, from about the middle of the Seventh month (July).

A General Index to the first 47 Vols. of the English Common Law Reports.

By Hon. General Sharswood and George W. Biddle, Eagle. 1 vol. 8vo.—43 00.

With this Key to their contents, the English Common Law Reports present to the Profession a mass of legal learning in the shape of Opinions, Data, elaborate Arguments, &c., &c., sufficient, probably, for the Elucidation and Prosecution or Defence of any case that can arise in our Courta of Law: and being thus made easily and instantly accessible, these Reports will be found so comprehensive, convenient, and cheap, as to supersede the necessity of other or more expensive scales.

The Index will be found of great value to all possessing the Reports; and of great convenience to those having access to, but not owning the series.

New English Exchequer Reports-Pleas and Equity.

To be reprinted in full, in best style, with American Notes, by J. I. CLARK HARE and H. B. WALLACE, Esqrs, at \$2.50 per vol., bound.
Including McClelland and Younge, Younge and Jervis, Crompton and Meeson, Crompton, Meeson and Roscoe, Meeson and Younge and Collyer—in Equity.

Messon and Welsby, in 19 vols., Welsby, Huristone an Gordon, vol. 1, published and ready for delivery.

We take pleasure in referring to the accompanying latters, explanatory of the character of these Reports, and their value to the Profession in this country:

CAMBRIDGE, January 25, 1845.

Messrs. T. & J. W. Johnson:

en.—In reply to your letter, I can with great ay, that I entertain a very high opinion of the sincerity say, that I enter recent Exchequer Reports. In my judgment they are not excelled by any cotemporaneous Reports, in learning, ability, or general utility and interest. The cases decided are discussed with great care, and expounded with uncommon force. I scarcely know of any volumes which I deem of more importance or value for a Professional Library.

JOSEPH STORY.

CAMBRIDGE, January 25, 1846.

Gentlemen: Your letter of the 24th has been received, in which you ask my opinion as to the value of the English Exchequer Reports, from Price downwards to this time, to an American Lawyer, and as to the expediency of reprinting them in this country. Of the high value of these Reports, both on the Pleus and Equity sides of the Court, I have not the least doubt—the decisions of this Court for the last fifteen or twenty years, both at Equity and in Common Law, being entitled to equal respect with any others in England. I should think an American Lawyer's Library essentially incomplete without them.

I am, gentlemen, very respectfully yours, SIMON GREENLEAF.

Fourth Series—Forty Volumes.

Twelve Dollars a year, bound—Ten Dollars in Numbers.

The cheapest Law Periodical in the United States.

It is our determination to make the Law Library the cheapest series of reprints of English Law publications in this country. The Editorial Department will, we trust, be found fully to realise the expectations of those who have enjoyed Smith's Mercantile Law, Touchstone, Broom's Legal Maxims, Archbold's Nisi Prius, Archbold's Landlord and Teniant, Crabb on Real Proporty, Smith on Contracts. The high reputation which the "Law Library" has acquired throughout the United States, by the character of its volumes, and by the cheap rate at which its valuable contents have been presented to the Profession, is the best evidence we can offer of its merits and its claims for your support. We hope, and will aim, to retain this high character.

Three Folumes—\$9.

From 1796 to 1840—To be continued.

The Decisions upon the Crown Cases reversed for the consideration of the Twelve Judges of England, are of the first importance to the due administration of the criminal justice of the country; and in committing to the press these which have occurred during a recent period of more than forty years, the publishers believe that they are making an acceptable communication to the Profession and the public.

The three volumes already published contain all the Reversed Cases since Leach.

FURNISHING MAIL LOCKS AND KETS.

Post Owner Department,
March 14, 1851.

IT being desirable to substitute locks and keys of some
other kind for those now in use for the mail service
of the United States, specimen locks and keys, with proposals to furnish the same, will be received and considered
at the Post Office Department until the first day of July
next. The different locks will be submitted to a commission for examination and report. Upon this report, contracts will, as soon as practicable, be entered into for furnishing such locks and keys for four years, with the right
on the part of the Postmaster General, for the time being. nishing such locks and keys for loar years, with the right on the part of the Postmaster General, for the time being, to extend and continue the contract in force for an addi-tional term of four years, by giving to the contractor a written notice to that effect, not more than nine nor less than six months before the termination of the first term

tional term of four years, by giving to the contractor a written notice to that effect, not more than nins nor less than six months before the termination of the first term of four years.

With a view of procuring the best lock at the lowest price, no kind of lock is prescribed as a standard, the Department relying for a selection on the mechanical skill and ingonuity which a fair competition, now invited, may develop. It is, however, proper to state that a lock suitable for the mail service should possess the following qualities, vis: durability, uniformity, lightness, and strength. For the purpose of displacing simultaneously all the mail locks and keys now in use, about thirty thousand new locks and twenty thousand keys adapted thereto will be required to be furnished by the contractor within seven months after the contract shall have been entered into; afterwards the annual supply will depend on the durability of the locks and keys adopted, as well as the increase of the mail service; but it will probably never exceed in amount three thousand of the former and one thousand of the latter.

No lock will be considered if it be like any already in general use; nor will any one with whom the contract may be made be allowed to make, sell, or furnish, any lock or key similar to those contracted for for any other purpose or use than that of the Post Office Department. The kind of lock adopted must be patented, and the patent for the exclusive use and benefit of the Department, if the Postmaster General shall deam such requirement essential to the interests of the service. In case of the failure of the contract, to make an assignment of his patent for the exclusive use and benefit of the Department, if the Postmaster General shall deam such requirement essential to the interests of the service. HUNT'S MERCHANTS' MAGAZINE
AND DOMMERCIAL REVIEW.
Established, July, 1889,

BY FREEMAN HUNT, EDITOR AND PROPRIETOR.

Established, July, 1839,
BY FREEMAN SIDET, EDITOR AND PROPRIETOR.

THE Number for December, 1860, completed the twenthy-third semi-samual volume. The work has been enlarged since its commencement in July, 1839, and such volume now contains more than seven hundred large octavo pages. A few complete sets of the Magazine may be obtained at the piblisher's office, 142 Fulton street, New York, neatly and substantially bound, for two dollars and a half per volume.

The following are a few of the many commendatory letters received by the editor of the Merchants' Magazine from distinguished statesmen:

Letter from the Hon. Henry Clay.

Assilend, 20th July, 1849.

Dear Sir: I wish to express to you the gratification I derived on receiving the July number of the Merchants' Magazine and Commercial Review, from viewing your portrait in the beginning, and from reading your address to your friends at the end of it. When we feel under obligations to those who have contributed to our information and amusement, we are naturally decirous to possess all the knowledge of them, of their appearance, of the features of their countenance, and of the character and habits of their mind, which we can acquire. You have placed your numerous readers (at least you have me, if I may sust speak for them) under those obligations; and the number of your valuable work now before me, in some degree, satisfies the desire to which I have alluded.

I have become quite familiar with the Magazine and Review, and have no hesitation in expressing my humble opinion that it is eminently entitled to the public regard and support. It collects and arranges, in good order, a large amount of valuable statistical and other information, highly useful not only to the merchant, but to the statesman, to the cultivator of the earth, to the manufacturer, to the mariner, in short, to all classes of the business and reading community.

Entertaining this opinion, I am glad that it has been, and hope that it may continue to be, liberally patronized.

Offering you cordial

where so well digested and so accessible as in these numbers. I only regret that I do not own the whole work."

Letter from the Hon. Thomas H. Benton.

WASHINGTON CITY, April 20, 1840.

Mr. Freeman Hunt.—Sir: I owe you many thanks for the opportunities I have had to read the Merchants' Magazine, and have found it in reality to be a magazine, and that well replenished, of all the useful matter which the title would imply, and presented with a fullness and clearness which delights while it instructs. It is, in fact, a merchants' magazine in the large acceptation of the term—merchants who go between nations, whose large operations bring many departments of knowledge, and a view of the state of the world, into daily requisition. But it is not the great merchant only, but the one of more modest, but, nevertheless, of most useful operations—the merchant of the interior also—who will find this magazine to abound with the information the pursuit of his business and the elevation of the mercantile character requires. Nor is its utility at all confined to merchants, but extends to the legislator and diplomatist, and to all who are charged with managing the affairs of the nation. For myself, I have found it most useful to me in my senatorial above, and have been in the habit for many years of carefully consulting it.

Very respectfully, sir, your obedient servant,

THOMAS H. BENTON.

Letter from Hon. Wm. H. Seward.

My Dear Sir: Have the goodness to place my name on your list of subscribers for the Merchanis' Magazine. I

My Dear Sir: Have the goodness to place my name on your list of subscribers for the Merchants' Magazine. I regard it as an invaluable work for the use of all who would understand not merely commercial operations in this extending country, but the fiscal and commercial questions involved in the administration of the government.

BALTIMORE PIANO FORTE MANUFACTORY.

WISE & BROTHER, Manufacturers of Boudoir, Grand, and Square Pianos, request those who would be assured of a first class Piano, one that ladies, can perform on with the greatest possible advantage—one that the tower can be instantly adjusted to the exact strength of the fingers and movement of music, one that will stand in concert tune, one that the tone will not become shrill and grating, that is chaste of style and elegantly made up of straight and regular curve lines, that will last an age—to drive them a call. The ancient standing of the Britimore factory, and liberal patronage of elizens and others of the first order of artistic taste and science, conceded at once the most critical, have been fully anticipated. Their recently finished Grand Piano, minutely reviewed by the most accomplished civil engineers and master artists, has been denominated truly a Grand Piano; also, that their late Boudoir, for style, power, and compass of tone, is not surpassed, if equalled, in the world. Friends and customers, please stop in and examine for yourselves.

three miles from the city of Buffalo, in a rural spot, and so accessible from all points as to be reached without inconvenience or delay.

A line of omnibuses runs from the steambeat landings in Buffalo to the springs every ten minutes.

The house and grounds are near the extensive and beautiful green-houses and nurseries of the Messrs. Hodges & Bryants; and the scenery in all directions is unsurpassed, as regards either variety or beauty; embracing points of view, from which may be taken in at a glance the broad expanse of Lake Eric, the Niagara flowing majestically towards the Falls, extensive forests, and the "Queen City of the Lakes," with its moving panorama of steamboats and ceaseless enterprise.

The water, taken immediately from the celebrated "Cold Spring," is unsurpassed as regards coldness and purity, by any in the United States. The house, recently erected at a cost of about seven thousand dollars, has been fitted up in a neat and elegant style, at considerable extra expense, and is sufficiently capacious to accommodate sevently-five patients.

Connected with the establishment, and constituting one of its attractions, are the fixtures and conveniences for innocent and healthful gymnustic exercises.

MEDICAL DEPARTMENT.

The institution is under the general supervision of S. M. Davis, M. D., Professor of the Theory and Practice of Medicine in Central Medical College, and Geo. W. Davis, M. D., formerly of Dansylle, N. Y., the resident physician, and is permanently associated with the before mentioned gentleman as counsel, and associate of the medical board of control. And the friends of the establishment deem it a matter of felicitation that the services of Miss Mary M. Taylor, a lady of high medical attainments, who has attended two courses of lectures in the Central Medical College, have been secured, and that female patients can at any time awali themselves of her invaluable ali and counsel.

The steward's department is under the control of a gentleman eminently qualified for that position; and unwearied pains will be taken to have every thing appertaining to the establishment arranged on a plan, and conducted in a way, to casure the comfort, and promote the health and happiness of all who may wish to avail themselves of its benefits. Baths of all descriptions, adapted to the cure of the various forms of disease, and constructed on a scale not inferior to those of any other establishment in this country.

An enlightened public sentiment has everywhere repudiated a reckless use of drugs in the treatment of disease; while intolerable sufferings and broken constitutions have imperatively demanded "Heform." A return from a wide and fatal departure from the simplicity of Nature's laws is called for, alike by a rational love of happiness and the deplorable exigencies of our condition. Hydropathy, or a scientific use of water as a restorative and curative agent, is a practical substitution of a simple and remarkably efficacious mode of curity the sick; for that system of drugging, depleting, and canterizing, which, in obtaining the mastery over disease, too frequently piaces the patient beyond the reach of furt
